NOV 28 1912

Nov. 25, 1912.

Dear Bro. Larimore:-

A copy of "Prospectus of Our Florida Friend" has fallen into my hands. I have been very much interested in the news it brings to me. There is a dignified, substantial ring to it. I hope and pray the work you have begun may prove a great success and accomplish great good for the Cause we love.

Learning of your purpose in this matter leads me to tell you of some plans I have on foot. For two years I have had plans arranged for the starting of an "Industrial School" on a large farm—a school in which students can work for their schooling. This work would have been started two years ago had I been able to get released from my work here. My knowledge of the fruit, truck, and nursery business, and my experience in the produce markets have fitted me in a special way for such a work. My seven years of college work has not been wasted. You know something of my work at Denton. I have had a hard proposition here at Sabinal, but I have

succeeded beyond the expectation of the people — if I might be permitted to modestly say this of myself. The work here is pleasant, and so far as I know I can stay here as long as I want to stay. But I cannot reach the great mass of poor, worthy young people that are begging for an education. I want to establish a school especially for them. Positively, there is no ^{other} line of school work as important now.

Since I have been in the school business my correspondence has been burdened with letters from young people wanting to come to school if they could get work to pay expenses. I wish space would permit me to write you full details of my plan to meet this demand.

I have asked some good, influential brethren to join me in this effort. We are going to have a meeting this coming Christmas week to decide on plans, ways and means, and start the move. We expect to have the school ready to open by next fall. We

Have not yet decided on a location. We have some in view.

We do not intend that this school shall conflict with any school our brethren have started. We expect to meet a demand that none of our schools can meet at present.

But the idea struck me, how nice and easy it would be to establish such a work in connection with the school you are starting. Why couldn't you keep one hundred acres of that land for a farm instead selling it all out in lots? How I would be pleased to help you start such a work!

I am not out of a "job", but I cannot meet the demands in any college of this kind. When I came to Sabinal I went too deep into the work here for my own personal good in a financial respect. I put about \$5000⁰⁰ into the school to equip it — that is I went into debt about this much. At that time I intended to remain here a long period

of time. But when I found I could not develop the special features I wanted here, I began to get my self loose. I lack about \$1000⁰⁰ being out, and I have good prospects of coming clear this year. I love this work here and I hate to leave it, but I have my heart set on the other plan. I am determined to devote my life - the remainder of it - to the work of helping young people who are short of means in getting the education they desire. By utilizing my knowledge and experience in the business world together with my college experience I can be of some help to many ambitious young people.

At your pleasure, I would be pleased to have a word from you.

Praying the Lord's richest blessing upon you, I am,

Traternally,
 Isaac E. Tackett

P.S. I want to see the "Christmas edition" of your paper. I am sending \$1.00 for a "paid in advance" subscription. If this is not enough let me know.
